

Procedure to write Japanese text on handphone

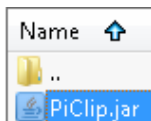

Part 1: Unzipping the files

Step 1: Visit <http://love.meganebu.com/~simontek/piclip.html> . Right click on the PiClip052.zip and save it to your computer.

<ダウンロード>

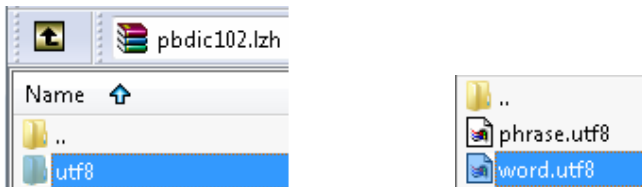

Step 2: Extract this file, **PiClip.jar**

Step 3: Download <http://love.meganebu.com/~simontek/piclip/pbdic102.lzh>

Step 4: Extract **word.utf8** in **utf8** folder.

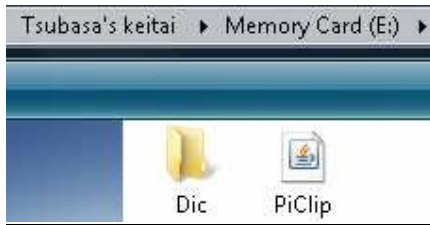

Checkpoint 1: You should have these 2 files.

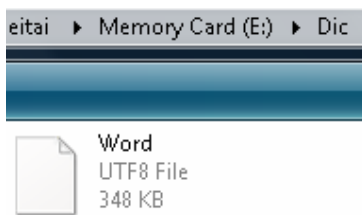

Part 2: Moving files & creating folders

Step 5: In your memory card root folder, create

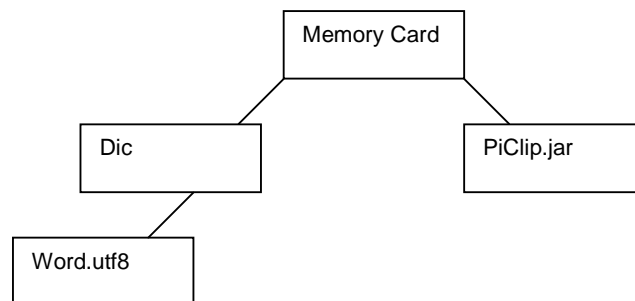

- 1) A folder called **Dic**
- 2) Copy **PiClip.jar** into the root folder (in my case, E: drive)

Step 6: Navigate into your Dic folder, copy **Word.utf8** into the folder.

Checkpoint 2: You should have a folder named **Dic** and these 2 files.

Part 3: Using PiClip

NOTE: You need to set the application access for the application to allow and edit data.

Step 7: Open **PiClip.jar** on your Handphone.

Step 8: When prompted to "Allow application to edit and add new data in Gallery", select Yes.

Step 9: When prompted to "Allow application to edit and add new data in Memory Card", select Yes.

- 1: あ、い、う、え、お (Keep pressing 1 to toggle between these 5 characters)
 - 2: か、き、く、け、こ (Same as above and for the rest)
 - 3: さ、し、す、せ、そ
 - 4: た、ち、つ、て、と
 - 5: な、に、ぬ、ね、の
 - 6: は、ひ、ふ、へ、ほ
 - 7: ま、み、む、め、も
 - 8: や、ゆ、よ
 - 9: ら、り、る、れ、ろ
 - *: For you to change か to が, き to ぎ, etc,
For characters like つ to change to っ
 - #: Toggle between the 5 characters instead of keep on pressing on the character.
- Delete: Delete last character.

Options

- CharType conv : Toggle between Hiragana and Katakana
- Full match : Match an exact word
- Normal Predict : Change from Full Match back to the default setting.
- Save : Save what you have type into the dictionary

Settings

- Screen : Normal, Full Screen
